RE: Albion-Sheridan QAPP Comments provided by Wade Hillman

Dear Mary Beth:

I have reviewed the QAPP comments and need clarification for the following:

QAPP

VII. Preventive Maintenance

Historically, we have not had to provide this for the SAS requests since those are boiler plate request forms. Is this really necessary? If so, can you provide us with an example from a recently approved QAPP?

VIII. Data Assessment B.

We purchase our bottles from I-Chem who perform bottle blank analyses. They provide us with the documentation, i.e., the analytical results. We feel this is sufficient. Is this acceptable to you?

X. SASs E.

We will not have field equipment blanks for surface water sampling or residential wells, therefore, no change will be made.

I will also be contacting Jan Pels to attempt to expedite the receipt of the most recent SAS request forms and EPA sample paperwork as this information has not been forwarded to me as of this date. I have attached a copy of the letter that I sent Jan regarding this.

Thank you for your assistance.

Sincerely yours,

WW ENGINEERING & SCIENCE
